**Learn How to Make Your First \$1,000 In Passive Income**

**"The best investment you can make is an investment in yourself. The more you learn, the more you will earn." Warren Buffett**

# Introduction

Whether you earn a decent paycheck or not, it's important to know how to make extra money on the side.

Inflation has made it harder for people to pay the bills and enjoy life the way they want to.

Having multiple streams of income gives you more financial security, peace of mind and of course, more money. A large number of people work two or more jobs, but they don't look at 'passive income' as much as they should.

At Invincible Robots, we want to help you achieve financial independence. This can happen faster when you have multiple income sources, including passive income, which is defined as income that generates itself without much manual work.

Rich people have about seven income streams. They make investments and choose income-generating businesses that allow them to spend their time how they'd like.

The average salary in the US is \$56,310.

The average expenditure is \$61,334.

The average American has \$90,460 in debt.

I've written this eBook to help you take control of your financial life. We'll talk about 20 ways to make money on the side and generate passive income.

We'll talk about how much money you can make and what experience, skills, or degree you need to get started. We'll also tell you where to find work.

To sum it up, this book will explain how you can make your first \$1,000 working from home.

Ultimately, you will have twenty ways to start making money while keeping

your office job, including ways to generate passive income.
